Developer

Batam, Riau Islands, Indonesia

## Summary

I'm a mobile developer with a background in graphic design, currently focused on iOS development using Swift, SwiftUI, and modern architectural patterns such as MVVM with strong clean architecture principles. My journey from design to software development allows me to approach product building with both technical precision and user centered thinking. I have worked on real-world projects through the BEKUP Create internship program, several product developments at Apple Developer Academy, and personal application projects that strengthened my experience in mobile engineering. My work includes backend understanding, API integration, and building maintainable application structures with a strong problem-solving mindset. With a foundation in design thinking and Human Interface Guidelines, I aim to create digital products that bridge usability and engineering quality. While my current focus is iOS native development, I also remain open to cross-platform development with Flutter as I continue growing as a software engineer. Always eager to learn, improve, and collaborate on meaningful products and impactful technology solutions.

---

## Experience

Apple Developer Academy @ Infinite Learning

iOS Developer

February 2026 - Present (5 months)

Batam

Participating in an intensive, challenge based program focused on building real world iOS applications using Swift.

Dicoding Indonesia

Course Experience Tester

October 2025 - December 2025 (3 months)

As a Course Experience Tester, I contributed to testing and evaluating the user experience quality of the Flutter Intermediate learning path at Dicoding Indonesia.

My responsibilities included:

- Identifying technical issues, bugs, and content inconsistencies within the learning platform.
- Providing constructive feedback to improve learning flow, content clarity, and overall user experience.
- Collaborating with the learning designer teams to ensure the learning product met quality standards.

This contribution helped enhance the learning experience and content quality for participants of the Flutter learning path program.

## BEKUP - Baparekraf for Startup

5 months

Project Manager – BEKUP Create 2025 (Second Best Capstone Project)

August 2025 - November 2025 (4 months)

Indonesia

Served as Project Manager for a four-member team developing BooLe, a Flutter-based mobile app designed to help international tourists navigate Indonesia safely and comfortably. Responsible for managing project timelines, assigning tasks, coordinating cross-functional work, and ensuring all milestones were delivered with quality. Led sprint planning, daily check-ins, and progress tracking to keep the team aligned and productive. Oversaw core feature development and conducted internal reviews to maintain product consistency. Successfully pitched the project, resulting in BooLe being awarded Second Best Capstone Project at BEKUP Create 2025.

## Flutter Developer Cohort at BEKUP Create

July 2025 - November 2025 (5 months)

Indonesia

Participating in an intensive incubation program by the Ministry of Creative Economy, focused on building digital product prototypes through hands-on workshops, tech training, and mentorship in the startup ecosystem.

## Cipta Art Advertising

Graphic Designer

February 2022 - October 2025 (3 years 9 months)

Batam, Riau Islands, Indonesia

Passionate about design and technology, I am currently working as a Graphic Designer at an advertising company in Batam. With a keen eye for creativity and user experience, I specialize in crafting visually compelling designs that engage audiences.

Beyond design, I am expanding my skill set by studying Computer Science and Full-Stack Web Development. My goal is to bridge the gap between design and development, creating seamless digital experiences that are both functional and aesthetically pleasing.

Always eager to learn and grow, I am open to networking, collaboration, and new opportunities in the tech and design space.
